1. BACKGROUND

UNDP supports countries in addressing development, climate change, and ecosystem sustainability in an integrated manner. As a Global Environment Facility (GEF) Implementing Agency, UNDP offers countries highly specialized technical services for programme/project formulation, due diligence, mobilization of required co-financing, implementation oversight, results management and evaluation, performance-based payments and knowledge management.

UNDP-GEF's Green, Low-emission, Climate-resilient Development strategies team works to support countries to attract and direct public and private investment towards catalyzing and supporting sustainable economic growth through initiatives focused on integrated Climate Change Strategies, Advancing Cross-sectoral Climate Resilient Livelihoods and Strengthening Climate Information and Early Warning Systems for Climate Resilient Development.

In 2012, UNDP-GEF designed a regional project for Africa that focuses on strengthening climate information and early warning systems for climate resilient development and adaptation to climate change (CIEWS-CIRDA Project). The countries involved in this project are Benin, Burkina Faso, Liberia, Sierra Leone, Sao Tome and Principe, Ethiopia, Uganda, Tanzania, Malawi and Zambia. The project was successfully launched by the Sierra Leone Meteorological Department of the Ministry of Transport and Aviation in Sierra Leone in 2013. The project is implemented in collaboration with the Disaster Management Department (DMD), Office of National Security (ONS), Sierra Leone Environment Protection Agency (SL-EPA), and Ministry of Water Resources in close collaboration with key stakeholders.

The project was designed to strengthen the early warning systems (EWS) of Sierra Leone, largely through improving national capabilities to generate and use climate information in the planning for and management of climate induced hazards, including floods, severe windstorms, droughts, etc. The Least Developed Country Fund (LDCF) intervention have been articulated around two components: (1): transfer of technologies for climate and environmental monitoring, and (2) climate information integrated into development plans and early warnings systems.

Implementation of the CIEWS-CIRDA Project is in its final months of implementation (October – November 2017). In accordance with UNDP and GEF Monitoring and Evaluation Procedures, all full and medium-sized UNDP support and GEF financed projects are required to undergo a terminal evaluation upon completion of implementation. These terms of reference set out the expectations for the terminal evaluation of a "Strengthening Climate Information and Early Warning Systems" Project, PIMS ID: 5107.

The UNDP therefore requests applications from suitably qualified international and national (Sierra Leonean) candidates to e to conduct the terminal evaluation, in line with the provisions of the terms of references (ToRs), as follows:
