INTRODUCTION

The Independent Evaluation Office (IEO) of the United Nations Development Programme (UNDP) conducts independent country programme evaluations (ICPEs), previously called “Assessment of Development Results) (ADRs) to capture and demonstrate evaluative evidence of UNDP’s contributions to development results at the country level, as well as the effectiveness of UNDP’s strategy in facilitating and leveraging national efforts for achieving development results. The purpose of an ICPE is to:

- Support the development of the next UNDP Country Programme Document
- Strengthen accountability of UNDP to national stakeholders
- Strengthen accountability of UNDP to the Executive Board

ICPEs are independent evaluations carried out within the overall provisions contained in the UNDP Evaluation Policy.¹ The IEO is independent of UNDP management and is headed by a Director who reports to the UNDP Executive Board. The responsibility of IEO is two-fold: (i) provide the Executive Board with valid and credible information from evaluations for corporate accountability, decision-making and improvement; and (ii) enhance the independence, credibility and utility of the evaluation function and its coherence, harmonization and alignment in support of United Nations reform and national ownership. Based on the principle of national ownership, IEO seeks to conduct ICPEs in collaboration with the national authorities where the country programme is implemented.

This is the first ICPE for Haiti and will be conducted in 2020 towards the end of the current UNDP programme cycle of 2017-2021, with a view to contributing to the preparation of UNDP’s new programme starting from 2022. The ICPE will be conducted in close collaboration with the Government of Haiti, UNDP Haiti country office, and UNDP Regional Bureau for Latin America and the Caribbean.

NATIONAL CONTEXT

Haiti is a country located on the island of Hispaniola in the Caribbean Sea. It occupies one third of the island which it shares with the Dominican Republic.

On January 2010, Haiti's capital, Port-au-Prince, was struck by an earthquake of magnitude 7. The earthquake killed an estimated 230,000 people and displaced 1.5 million. It resulted in damages and losses of US\$7.9 billion (120 percent of GDP) and in US\$11.3 billion in estimated reconstruction needs². The disaster exacerbated Haiti's many preexisting development challenges as well as most of its socioeconomic indicators. Compounding these challenges, cholera broke out in 2010, sickening 760,000 people and killing almost 9,000. Intensified control efforts—including an ambitious vaccination campaign—have resulted in a significant decline in cases, from more than 41,000 suspected cases and 440 deaths in 2016, to over 3,000 suspected cases and 37 deaths from January through August 2018³, and there have been no laboratory-confirmed cases since January 2019.

² Country Partnership Framework (2015), World Bank

³ Haiti's Political and Economic Conditions (2020), Congressional research service

Haiti is the poorest country in the western hemisphere. Almost 60 percent of Haiti's population, 6.3 million people, remain poor, and 2.5 million, extremely poor. Poverty incidence is highest and deepest in rural areas⁴ where 48.1 percent of the population lives⁵. Haiti's annual population growth remains high, at 1.3 percent⁶. Inequality in Haiti is also the highest in the Americas with a Gini indicator at 0.6⁷.

In 2019, Haiti ranked 169th out of 189 countries on Human Development Index (9.5 expected years of schooling and 2.4 percent of GDP expenditure in education, 63.7 life expectancy at birth with a GDP expenditure in health of 5.4 percent). The country is also severely affected by HIV (2.2 percent of adults between the ages of 15-49).

After a 5.3 percent contraction in GDP in 2010 due to the earthquake, Haiti experienced a growth rate averaging 2.8 percent, from 2011 to 2017, spurred in part by high levels of reconstruction aid and remittances. According to the IMF, the growth projection for 2020 is 1.7 percent⁸. Indeed, the situation has deteriorated in 2019. The political instability has hindered Haiti's economic development. The country has experienced rapid currency depreciation (close to 30 percent), high levels of inflation (close to 20 percent), and a contraction in GDP. The fiscal deficit narrowed compared to the previous year (projected at 2.9 percent) but it has been achieved through drastic cuts in capital investment and social programmes. Energy subsidies represent a large fiscal burden estimated at some 3.5 percent of GDP.⁹

The structure of production of the Haiti's economy is still dominated by agriculture (70 percent of working population and less than 25 percent of GDP). Youth unemployment is a destabilizing factor that affects 30 percent of people aged between 15-24 and that contribute to propagation of armed gangs and criminal networks.

Haiti made significant progress in improving governance prior to the 2010 earthquake, but recovery since then has been slow. Democratic institutions remain weak and stability fragile¹⁰. Over the past couple of years, public protests requested the government to do more to fight corruption. The Senate's Special Commission of Investigation released a report detailing alleged fraud by current and former Haitian officials in loans from Venezuela's PetroCaribe discounted oil programme. The report was received with street protests against corruption. According to the corruption perception index¹¹, Haiti ranks 161 of 180 countries.

Excellency M. Jovenel Moïse was inaugurated as president on February 7, 2017, marking a return to constitutional order after having been without an elected president from February 2016 to February 2017. In September 2017, the president's budget for 2018 was approved, which included several tax increases. The public greeted these tax increases with violent street protests. In 2018, decision to end oil subsidies also sparked massive protests and the worst political and social unrest the country has seen in years. Several other similar lockdown movements lasting several weeks and even months, calling for the resignation of President Jovenel Moise, and more recently, schools were closed between September and December 2019. Population distrust in their government remains high with a participation in election below 25%, compared to 60% in 2006 election¹². In October 2019 legislative elections were not held exacerbating political instability, and this in addition to the legislature's mandate expiring in January 2020.

¹² Addendum au bilan commun de pays (2020), UN

As a result, President Moïse is now ruling by decree. Although attempts were made for a national dialogue between October and February, tension between the executive and legislative continued, and in early March 2020, President Moïse appointed a new government, led by Prime Minister Joseph Jouthe. The next presidential elections are due in 2021 and are expected to be volatile.¹³

Political instability and weak economic recovery facilitated the resurgence of gang violence leading to further instability in Haiti.¹⁴ An aggravating factor is Haiti geographical position. Haiti is a transit point for cocaine from South America and marijuana from Jamaica headed to U.S. and other markets.¹⁵ According to the United Nations Mission for Justice Support in Haiti (MINUJUSTH), 159 gangs are active in Haiti in 2019. The general security situation has become unpredictable, and crime levels are high.¹⁶ While the capacity of the Haitian National Police has improved in recent years (expanded from 3 000 in 2004 to 15 000 in 2018), the recent exchange of gunfire between protesting police officers and soldiers of the recently reinstated Haitian Armed Forces on February 23 could lead to a fragmentation of security forces and a further deterioration of the security situation.¹⁷

Haiti is one of the most exposed countries in the world to natural hazards and the country remains vulnerable. More than 96 percent of the population is exposed to hurricanes, floods and earthquakes. Recovery efforts continue more than three years after Hurricane Matthew (2016), which caused losses and damages estimated at 32 percent of 2015 GDP¹⁸. From 1994-2013, Haiti was considered the third most affected country by extreme weather events in terms of lives lost and economic damages¹⁹. Climate change is expected to exacerbate the risk of hazards by increasing the frequency and/or intensity of extreme events and thus further increasing Haiti's vulnerability. Climate change may also reduce agricultural productivity and pose a significant threat to food security (70 percent of the population is currently affected by food security²⁰ and 5.5 percent of the population is dependent of humanitarian aid²¹). Extensive use of wood fuels has caused massive deforestation and soil erosion (in 2012, 92.7 percent of the population used wood for cooking²²), worsening the impacts of disasters related to climate change. Haiti is also facing a new challenge brought by the COVID-19 outbreak. Fifteen cases were confirmed within its borders at the end of March 2020. The Government announced a number of measures to slow the spread of COVID-19, including the implementation of a curfew, temporarily closing its border including commercial flights and closing schools, universities, and factories. Nevertheless, the weak health structure of the country makes it very challenging for the Government to respond to the COVID-19 crisis.

Though Haiti is close to achieving gender equality in primary and secondary education, women and girls have far much less access to justice, economic opportunity and maternal health. Evidence from the 2015 Poverty Assessment showed that women and girls in Haiti face significant obstacles when accumulating assets (women are 20 percent more likely to be unemployed, face greater economic insecurity and earn 32 percent less than men). Women also are more likely to be illiterate and register lower education and health outcomes. Only 4 percent of all parliamentary seats are occupied by women, placing Haiti 136th of

142 countries. In 2018, the country had a Gender Inequality Index of 0.620 and a gender development index of 0.890.

UNDP PROGRAMME IN HAITI

The United Nations Stabilization Mission in Haiti (MINUSTAH) was established in 2004 to restore security and stability, support the political process, strengthen government institutions and rule-of-law structures, and promote and protect human rights. In 2017, the UN Security Council, in its resolution 2350 decided that MINUSTAH would close on 15 October 2017, transitioning to a smaller follow up peacekeeping mission (United Nations Mission for Justice Support in Haiti – MINUJUSTH) which would support government efforts to strengthen rule of law institutions, further develop the Haitian National Police and engage in human rights monitoring, reporting and analysis. MINUJUSTH completed its mandate on 15 October 2019, putting an end to 15 consecutive years of peacekeeping operations in the country. The UN Security Council, in its resolution 2476 of 25 June 2019, established the United Nations Integrated Office in Haiti (BINUH), a special political mission working on strengthening political stability and good governance, advancing a peaceful and stable environment, including through supporting an inclusive inter-Haitian national dialogue, and protecting and promoting human rights. The activities of the mission are integrated with those of the 19 agencies, funds and programmes of the United Nations Country Team.

The UNDP country programme in Haiti for the period 2017-2021 is aligned with the United Nations Sustainable Development Framework for Haiti (UNSDF) for the same period. The UNSDF 2017-2021 includes a total of 5 outcomes, with indicative resources amounted to around 1,085 million USD. The humanitarian response is considered a crosscutting theme integrated in key interventions of the 5 outcomes. UNDP is involved in all 5 outcomes but plays a lead role in 3: (i) democratic governance and rule of law; (ii) poverty reduction; and (iii) reducing vulnerability and strengthening resilience, with a total of 10 outputs. UNDP plans to partner with the UN mission to further its activities. It also plans to partner with several UN agencies and other organizations in different initiatives and interventions.

In the area of democratic governance and rule of law, UNDP plans to pursue three priority areas of work: (a) institutional strengthening of the public administration and local governance for fairer access throughout the country to basic services, livelihood opportunities and territorial development; (b) strengthening the rule of law and human rights through interventions on citizen security, justice, the national police, prison management, and access to justice and legal aid; and (c) increased citizen participation in more credible democratic processes, including support for the modernization of civil status. This is an area where UNDP plans to build on the progress in terms of stabilization through MINUSTAH. In 2016, UNDP launched a joint Rule of Law programme in Haiti with the participation of MINUSTAH, UNICEF and UN Women, aiming at pooling efforts and resources to support the area of rule of law (reducing community violence and increasing access to justice, especially for minors and women) in a context marked by the transition. Integration efforts are a major feature of UNDP's work in democratic governance and rule of law.

With regard to poverty reduction, UNDP plans to work in three areas: (a) inclusive growth (employment, support to small and medium-sized enterprises, development of value chains focusing on traditional Haitian products); (b) social inclusion (supporting the Ministry of Planning, the Haitian Statistics Institute

and the Observatory Unit on Poverty and Social Exclusion to better direct public policies towards the most vulnerable, with a focus on social protection); and (c) strengthening of the agricultural sector (institutional capacity building to transform the sector, including through initiatives for better access to small-scale irrigation).

In the area of reducing vulnerability and strengthening resilience, UNDP plans to work on environment and disaster risk reduction, promoting the mainstreaming of environmental considerations into strategies, policies and development programmes, placing emphasis on ecosystem resilience and services, pursuing advocacy and awareness/education on the challenges of conservation and responsible natural resources management, and strengthening national and local capacities to collect and use information on climate risk and disseminate hydro-meteorological and environmental warnings, including the development of a system for monitoring progress and analyzing risks, and the establishment of a national database on disaster-related loss and damage.

The UNSDF outcomes which UNDP is involved in, UNDP programme outputs and indicative resources are summarized in the following table:

Table 1: UNSDF outcomes which UNDP is involved in, UNDP programme outputs and indicative resources (2017-2021)

UNSDF outcomes which UNDP is involved in and UNDP country programme outputs	Indicative resources (US\$ thousands)		
	Regular resources	Other resources	
Outcome 1: The public institutions and civil society improve the rule of law and decentralization for good governance at all decision-making levels	Output 1: The capacities of State legal institutions are reinforced, allowing women and men to enjoy greater access to formal justice and a safe environment Output 2: The functions, financing and capacities of subnational institutions are strengthened in order to provide basic services and respond to the population's needs Output 3: Subnational development plans are gender-sensitive and in line with the Sustainable Development Goals Output 4: Mechanisms, instruments and spaces of communication, dialogue and interaction between the State and citizens to increase citizen control are in place and operational	4,100	22,300
Total outcome 1		26,400	

Outcome 2: The population, particularly the most vulnerable, have equitable access to livelihoods, decent “green” jobs and productive resources to reduce poverty in all of its forms, within a favorable and inclusive socio-economic and cultural environment	Output 1: The available options for inclusive and sustainable social protection are operational and supported Output 2: Women and youth benefited from facilitated access to economic opportunities, including in the formal job market Output 3: National and territorial agricultural institutions are operational in order to carry out in-depth transformation of agricultural production methods, which would be both sustainable and employment- and income-generating	7,300	99,400
Total outcome 2			106,700
Outcome 3: National, regional and local institutions and civil society improve the management of rural and urban areas, agriculture and the environment, and mechanisms for preventing and reducing risks in order to improve the resilience of the population to natural disasters and to climate change	Output 1: National actors have the knowledge, capacities and necessary tools to improve natural resources management and risk reduction and management Output 2: Mechanisms and partnerships are set up to promote sustainable models of production, distribution and consumption Output 3: The capacities of public administrations to enforce the application of environmental norms and good practices are strengthened	5,842	62,200
Total outcome 3			68,042
Grand total			201,142

Source: UNDP Haiti Country Programme Document 2017-2021

SCOPE OF THE EVALUATION

ICPEs are conducted in the penultimate year of the ongoing UNDP country programme in order to feed into the process of developing the new country programme. The ICPE will focus on the present programme cycle (2017-2021) while taking into account interventions which may have started in the previous programme cycle (2013 - 2016) but continued for a few more years into the current programme cycle.

As a country-level evaluation of UNDP, the ICPE will focus on the formal UNDP country programme approved by the Executive Board but will also consider any changes from the initial CPD during the period under review. The ICPE covers interventions funded by all sources of finance, core UNDP resources, donor funds, government funds, etc. It is important to note that a UNDP country office may be involved in a number of activities that may not be included in a specific project. Some of these “non-project” activities may be crucial for advancing the political and social agenda of a country. The ICPE will also capture UNDP’s integration efforts and collaboration with the UN missions (MINUSTAH, MINUJUSTH, BINUH).

Special efforts will be made to capture the role and contribution of UNV and UNCDF through undertaking joint work with UNDP. This information will be used for synthesis in order to provide corporate level evaluative evidence of performance of the associated fund and programme.

METHODOLOGY

The evaluation methodology will adhere to the United Nations Evaluation Group (UNEG) Norms & Standards.²³ The ICPE will address the following three main evaluation questions.²⁴ These questions will also guide the presentation of the evaluation findings in the report.

1. What did the UNDP country programme intend to achieve during the period under review?
2. To what extent has the programme achieved (or is likely to achieve) its intended objectives?
3. What factors contributed to or hindered UNDP's performance and eventually, to the sustainability of results?

To address question 1, a Theory of Change (ToC) approach will be used in consultation with stakeholders, as appropriate, to better understand how and under what conditions UNDP's interventions are expected to lead to democratic governance, poverty reduction and strengthened resilience in the country. Discussions of the ToC will focus on mapping the assumptions behind the programme's desired change(s) and the causal linkages between the intervention(s) and the intended country programme outcomes.

As part of this analysis, the progression of the programme over the review period will also be examined. In assessing the CPD's progression, UNDP's capacity to adapt to the changing governance, economic and humanitarian context in Haiti (including the political crisis since July 2018, the deteriorating security situation and economic situation due to political and institutional instability, the transition from MINUSTAH to MINUJUSTH and BINUH, and UNDP's collaboration with these missions, etc.) and respond to national development needs and priorities will also be looked at.

The effectiveness of UNDP's country programme will be analyzed in response to evaluation question 2. This will include an assessment of the achieved results and the extent to which these results have contributed to the intended CPD objectives and responded to the Government's priorities. In this process, both positive and negative, direct and indirect as well as unintended results will be identified.

To better understand UNDP's performance, the specific factors that influenced - positively or negatively - UNDP's performance and eventually, the sustainability of results in the country will be examined in response to evaluation question 3. In addition to country-specific factors that may explain UNDP's performance, the utilization of resources to deliver results (including managerial practices), the extent to which the CO fostered partnerships and synergies with other actors (including through south-south and triangular cooperation), and the integration of gender equality and women's empowerment in design and implementation of the CPD are some of the aspects that will be assessed under this question.

²³ <http://www.uneval.org/document/detail/1914>

²⁴ The ICPEs have adopted a streamlined methodology, which differs from the previous ADRs that were structured according to the four standard OECD DAC criteria. More detailed sub-questions will be developed during the desk review phase of the evaluation.

DATA COLLECTION

Assessment of existing data and data collection constraints. An assessment was carried out for each outcome area to ascertain the available information, identify data constraints, to determine the data collection needs and methods. The assessment outlined the level of evaluable data that is available. The assessment indicated that there were seven decentralized evaluations undertaken during the period from 2017 to present, which were all project evaluations. Six of the decentralized evaluations were quality-assessed by IEO: one report was rated as satisfactory (rating of 5), three reports were rated as moderately satisfactory (rating of 4), one report was rated as moderately unsatisfactory (rating of 3) and one report was rated as unsatisfactory (rating of 2). Where the quality was acceptable, the evaluations will serve as inputs into the ICPE. The majority of projects have project documents, and some annual progress reports are available. Overall, the programme has sufficient information to conduct the ICPE.

With respect to indicators, the CPD list 10 indicators for the 3 outcome results, and 27 indicators to measure the 10 outputs, with baseline and targets. To the extent possible, the ICPE will seek to use these indicators to better understand the intention of the UNDP programme and to measure or assess progress towards the outcomes. The indicators mostly indicated national statistics, and reports of various ministries as data sources, and the evaluation's ability to measure progress against these indicators will therefore depend on national statistical capacities, including the periodicity of the national data system and the availability of disaggregated data by age, sex, geographic area, etc.

It is also important to note that UNDP projects that contributed to different outcomes are at different stages of implementation, and therefore it may not always be possible to determine the projects' contribution to results. In cases where the projects/initiatives are still in their initial stages, the evaluation will document observable progress and seek to ascertain the possibility of achieving the outcome given the programme design and measures already put in place.

Regarding field work, due to the volatile security situation of the country (currently the security level of the capital Port-au-Prince is defined as level 3 (moderate) by UNDSS), there might be some restrictions on the evaluation team's ability to travel in the city and in different parts of the country. The evaluation team will work closely with the CO and consult UNDSS in determining the necessary security measures and the sites for field visits.

Data collection methods: The evaluation will use data from primary and secondary sources, including desk review of documentation and information and interviews with key informants, including beneficiaries, partners and managers. An advance questionnaire will be administered to the country office before the data collection mission in the country. A multi-stakeholder approach will be followed and interviews will include government representatives, civil-society organizations, private-sector representatives, UN agencies, multilateral organizations, bilateral donors, and beneficiaries of the programme. Focus group discussions will be used to consult some groups of beneficiaries as appropriate.

The evaluation team will also undertake field visits to selected project sites to observe the projects first-hand. It is expected that regions where UNDP has a concentration of field projects (in more than one outcome area), as well as those where critical projects are being implemented will be considered. There should be a coverage of all outcome areas. The coverage should include a sample, as relevant, of both successful projects and projects reporting difficulties where lessons can be learned, both larger and smaller pilot projects, as well as both completed and active projects.

The IEO and the country office have identified an initial list of background and programme-related documents which is posted on an ICPE SharePoint website. The following secondary data will be reviewed, among others: background documents on the national context, documents prepared by international partners during the period under review and documents prepared by UN system agencies; programme plans and frameworks; progress reports; monitoring self-assessments such as the yearly UNDP Results Oriented Annual Reports; and evaluations conducted by the country office and partners.

In line with UNDP's gender mainstreaming strategy, the ICPE will examine the level of gender mainstreaming across all of UNDP Haiti programmes and operations. Gender disaggregated data will be collected, where available, and assessed against its programme outcomes.

Validation. The evaluation will use triangulation of information collected from different sources and/or by different methods to enhance the validity of findings.

Stakeholder involvement: A participatory and transparent process will be followed to engage with multiple stakeholders at all stages of the evaluation process. During the initial phase a stakeholder analysis will be conducted to identify all relevant UNDP partners, including those that may have not worked with UNDP but play a key role in the outcomes to which UNDP contributes. This stakeholder analysis will serve to identify key informants for interviews during the main data collection phase of the evaluation, and to examine any potential partnerships that could further improve UNDP's contribution to the country.

MANAGEMENT ARRANGEMENTS

Independent Evaluation Office of UNDP: The UNDP IEO will conduct the ICPE in consultation with the UNDP Haiti Country Office, the Regional Bureau for Latin America and the Caribbean and the Government of Haiti. The IEO Lead Evaluator will lead the evaluation and coordinate the evaluation team. The IEO will meet all costs directly related to the conduct of the ICPE.

UNDP Country Office in Haiti: The country office will support the evaluation team to liaise with key partners and other stakeholders and ensure that all necessary information regarding UNDP's programmes, projects and activities in the country is available to the team, and provide factual verifications of the draft report on a timely basis. The country office will provide the evaluation team in-kind organizational support (e.g. arranging meetings with project staff, stakeholders, beneficiaries; assistance for project site visits). To ensure the independence of the views expressed, country office staff will not participate in interviews and meetings with stakeholders held for data collection purposes. The country office will jointly organize the final stakeholder meeting, ensuring participation of key government counterparts, through a videoconference with the IEO, where findings and results of the evaluation will be presented. Additionally, the country office will support the use and dissemination of the final outputs of the ICPE process.

UNDP Regional Bureau for Latin America and the Caribbean (RBLAC): RBLAC will support the evaluation through information sharing and will also participate in discussions on emerging conclusions and recommendations.

Evaluation Team: The IEO will constitute an evaluation team to undertake the ICPE. The IEO will ensure gender balance and take into account the country's working language (French) in the team which will include the following members:

- **Lead Evaluator (LE):** IEO staff member with overall responsibility for managing the ICPE, including preparing for and designing the evaluation (i.e. the present ToR) as well as selecting the evaluation team and providing methodological guidance. The LE will be responsible for the synthesis process and the preparation of the draft and final evaluation reports. The LE will be backstopped by another evaluator also from the IEO.
- **Associate Evaluator (AE):** The AE will support the LE in the preparation and design of the evaluation, including background research and documentation, the selection of the evaluation team, and the synthesis process. The AE will review the draft report and support the LE in other aspects of the ICPE process as may be required.
- **Consultants:** 3 consultants (international and national) will be recruited and will be responsible for the outcome areas. Under the guidance of LE, they will conduct preliminary research and data collection activities, prepare outcome analysis, and contribute to the preparation of the final ICPE report.

The roles of the different members of the evaluation team can be summarized in Table 2.

Table 2: Data collection responsibilities by outcome areas

Outcome	Report	Data collection
Democratic governance and rule of law (outcome 1)	Consultant/LE	Consultant/LE
Poverty reduction (outcome 2)	Consultant/ALE	Consultant/ALE
Reducing vulnerability and strengthening resilience (outcome 3)	Consultant/LE/ALE	Consultant/LE/ALE
General strategic and management issues	LE/ALE	LE/AE/consultant

EVALUATION PROCESS

The evaluation will be conducted according to the approved IEO process. The following represents a summary of the five key phases of the process, which constitute the framework for conducting the evaluation.

Phase 1: Preparatory work. The IEO prepares the ToR and the evaluation design, including an overall evaluation matrix. Once the TOR is approved, additional evaluation team members, comprising international and/or national development professionals will be recruited. The IEO starts collecting data and documentation internally first and then filling data gaps with help from the UNDP country office.

Phase 2: Desk analysis. Evaluation team members will conduct desk review of reference material, and identify specific evaluation questions, and issues. Further in-depth data collection will be conducted, by administering an advance questionnaire and interviews (via phone, Skype, etc.) with key stakeholders, including country office staff. Based on this, detailed evaluation questions, gaps and issues that require validation during the field-based phase of the data collection will be identified.

Phase 3: Field-based data collection. During this phase, the evaluation team undertakes a mission to the country to engage in data collection activities. The estimated duration of the mission is around 2-2.5 weeks. The evaluation team will liaise with CO staff and management, key government stakeholders and other

partners and beneficiaries. At the beginning of the field mission, the evaluation team will hold a kick-off meeting at the CO to introduce the evaluation, its objectives and process to ensure good understanding and involvement. At the end of the mission, the evaluation team will hold a debrief presentation of the key preliminary findings at the CO. Efforts have been made to coordinate the timing of the evaluation mission with the audit mission by the Office of Audit and Investigation, planned to take place in the period of 22 June – 4 July 2020. Overlapping the evaluation and the audit missions to have some joint meetings in the country will facilitate sharing of information, minimizing any duplication in data collection efforts between IEO, OAI and the CO itself, thus enhancing the efficiency of both exercises.

Phase 4: Analysis, report writing, quality review and debrief. Based on the analysis of data collected and triangulated, the LE will undertake a synthesis process to write the ICPE report. The draft will first be subject to peer review by IEO and its Evaluation Advisory Panel. Once the draft is quality cleared, it will be circulated to the country office and the UNDP Regional Bureau for Latin America and the Caribbean for factual corrections. The second draft, which takes into account any factual corrections, will be shared with national stakeholders for further comments. Any necessary additional corrections will be made and the UNDP Haiti country office will prepare the management response to the ICPE, under the overall oversight of the regional bureau.

The report will then be shared at a final debriefing where the results of the evaluation are presented to key national stakeholders. The way forward will be discussed with a view to creating greater ownership by national stakeholders with respect to the recommendations as well as to strengthening accountability of UNDP to national stakeholders. Taking into account the discussion at the stakeholder event, the evaluation report will be finalized and published.

Phase 5: Publication and dissemination. The ICPE report will be written in English. It will follow the standard IEO publication guidelines. For better engagement of the national partners in the process and better utilization of the final report at the national level, arrangements will be made for the translation of the report into French as needed. The ICPE report will be widely distributed in both hard and electronic versions. The evaluation report will be made available to UNDP Executive Board by the time of approving a new Country Programme Document. It will be widely distributed by the IEO within UNDP as well as to the evaluation units of other international organisations, evaluation societies/networks and research institutions in the region. The Haiti country office and the Government of Haiti will disseminate to stakeholders in the country. The report and the management response will be published on the UNDP website²⁵ as well as in the Evaluation Resource Centre. The Regional Bureau for Latin America and the Caribbean will be responsible for monitoring and overseeing the implementation of follow-up actions in the Evaluation Resource Centre.²⁶

²⁵ web.undp.org/evaluation

²⁶ erc.undp.org

TIMEFRAME FOR THE ICPE PROCESS

The timeframe and responsibilities for the evaluation process are tentatively²⁷ as follows in Table 3:

Table 3: Tentative timeframe for the ICPE process going to the Board in September 2021		
Activity	Responsible party	Proposed timeframe
Phase 1: Preparatory work		
TOR completed and approved by IEO Director	LE	March 2020
Selection of consultant team members	LE	April 2020
Notification and Identification of the institutions & partners to be met	LE/CO	April/May
Phase 2: Desk analysis		
Preliminary desk review of reference material	Evaluation team	March-April 2020
Advance questionnaires to the CO	LE/AE/CO	April 2020
Phase 3: Field-based data collection		
Mission to Haiti	LE/AE/Consultants	22 June – 4 July 2020
Phase 4: Analysis, report writing, quality review and debrief		
Analysis of data and submission of background papers	Consultants	July – August 2020
Synthesis and report writing	LE/AE	August-September 2020
Zero draft for internal IOE clearance/EAP comments	LE	October 2020
First draft to CO/RBLAC for comments	LE/CO/RBLAC	End October 2020
Second draft shared with the government, key donors and national stakeholders	LE/CO/GOV	End November 2020
Draft management response	CO	November-December 2020
Stakeholder workshop via videoconference	IEO/CO/RBLAC	December 2020
Phase 5: Publication and dissemination		
Editing and formatting	IEO	January 2021
Final report and evaluation brief	IEO	January 2021
Dissemination of the final report	IEO	February 2021

²⁷ The timeframe, indicative of process and deadlines, does not imply full-time engagement of evaluation team during the period.

ANNEX 2. EVALUATION FRAMEWORK

Evaluation Questions	Sub-questions	Data/Info to be collected	Data collection methods and tools (e.g.)	Data analysis (e.g.)
EQ 1. What did the UNDP country programme intend to achieve during the period under review?	1.1 What are UNDP's outcomes as defined in the CPD?	<p>UNDP's specific areas of work and approaches for contribution under CPD/UNDAF outcomes.</p> <p>UNDP's interventions strategy, e.g. theory of change that maps an expected pathway of change, logic and assumptions, including plans detailing required financial resources and capacity for programme implementation (and evidence of their provision).</p> <p>Evidence of design tailored to meeting development challenges and emerging needs of the country.</p> <p>Evidence of design based on a clear and comprehensive risks analysis.</p>	<p>Desk/literature review of relevant documents (including problem analysis conducted by the CO)</p> <p>Semi-structured interviews/group discussions with relevant stakeholders conducted remotely</p> <p>CO Questionnaire Survey</p>	<p>Map a theory of change to identify the logic, sequence of events and assumptions behind the proposed programme</p> <p>Problem/risk analysis of underlying development challenges</p> <p>Stakeholders analysis</p> <p>SMART analysis of CPD indicators</p> <p>Triangulate data collected from various sources and means (e.g. cross check interview data with desk review to validate or refute TOC).</p>
	1.2 If there have been any changes to the programme design and implementation from the initial CPD, what were they, and why were the changes made?	Evidence of existence and application of relevant measures to respond to the changes put and their coordination/consistency across the implemented activities.		
EQ 2. To what extent has the programme achieved (or is likely to achieve) its intended	2.1 To what extent and with which results did UNDP achieve its specific objectives (CP outputs) as defined	<p>Progress towards achievement of intended objectives per sector (including a list of indicators chosen for the CPD and those used for corporate reporting, baselines, targets; and status)</p>	<p>Desk/literature review of relevant documents</p> <p>Assessment of ROARs, GRES as well as indicators status to assess progress and trends</p>	<p>Contribution analysis against TOC assumptions</p> <p>Counterfactual analysis to check whether results could have been delivered without UNDP</p>

objectives?	in the CPD and other strategies (if different)?	Evidence of achievement of results within the governance - poverty-environment/energy-climate nexus	Project QA data extraction Semi-structured interviews/group discussions with relevant stakeholders conducted remotely	Analysis of evaluations and audits; Summary of outcome indicators and status Analysis of corporate surveys
	2.2 To what extent did the achieved results contribute to the outcome?	Clear linkages between UNDP's specific interventions and UNDAF-defined outcome level changes Evidence of contribution to GEWE Evidence of contributions to the SDGs	CO Questionnaire Survey	Trend analysis of ROARs & GRES
	2.3 Were there positive or negative, direct and indirect unintended outcomes derived from UNDP's interventions?	Evidence of positive or negative, direct and indirect unintended outcomes derived from UNDP's interventions	Project implementation reports	Triangulate data collected from various sources and means.
EQ 3. What factors contributed to or hindered UNDP's performance and eventually, to the sustainability of results?	3.1 What programme design and implementation-related factors have contributed to or hindered results?	Key factors affecting the results (Typology of key factors to be created, e.g.): <ul style="list-style-type: none">• Degree of alignment with national priorities• Programme focus/design and implementation approach (e.g. mix of interventions, up/downstream, short/long-term, appropriateness of indicators)• Business environment to promote GEWE• Use of partnerships (incl. UNV/UNCDF, PUNS, IFI, CSO, Private sector, think tanks)• Innovation and knowledge management• Use of SSC to enhance results• Measures to ensure efficient use of resources• M&E capacity	Project QA data extraction Semi-structured interviews/group discussions with relevant stakeholders (conducted remotely)- focus on validating or refuting lines of inquiry and collecting perceptions and observations on the "why" and factors that influence or impede effectiveness. Tabulation of corporate surveys data CO Questionnaire Survey	Completion of a template of 'factors' with analysis of 'strength of influence (extent the factors affect UNDP's ability to achieve its objectives)' Contribution analysis against TOC assumptions; Counterfactual analysis to check whether results could have been delivered without UNDP Analysis of evaluations and audits; Analysis of corporate surveys Trend analysis of ROARs & GRES Cross-check interview data with desk review to validate or refute lines of inquiry – highlighting data on the "why" and factors that influence or impede effectiveness; (check for unintended outcomes);
	3.2 How have the key principles of the Strategic Plan been applied to the country programme design ²⁸			

²⁸ As the CPDs under review may be based on the previous Strategic Plan (2014-2017), we should select a set of key principles reflected in both old and new Strategic Plan for our purpose, to examine how they have been reflected in programme design and used to enhance the results). For example, in the new Strategic Plan 2018-2021, the key issues include: (1) 'Working in partnership': i) Within UN System; and ii)Outside UNS (South-South; civil society; private sector; and IFIs); (2) 'Helping to achieve the 2030 Agenda'; (3) '6 Signature Solutions': i) Keeping people out of poverty; ii) Strengthen effective, accountable, inclusive governance; iii) enhance prevention and recovery for resilient society; iv) promote nature-based solutions for sustainable plant; v) close the energy gap; and vi) strengthen gender equality; (4) 'Improved business models (Performance; and Innovation)

	<ul style="list-style-type: none"> • ‘Social & Environment Standards’ (incl human rights, environment sustainability) • Project delivery modality (NIM/DIM) 		Triangulate data from desk review and interviews with survey to close gaps and findings
3.3 What mechanisms were put in place at the design and implementation stage to ensure the sustainability of results, given the identifiable risks?	<ul style="list-style-type: none"> • Level of capacity of partner institutions/organisations/beneficiaries • Supported government policies and mechanisms encourage continuation • Government mechanisms and budgets in place for managing, operating and maintaining set of supported institutional measures • Evidence of appropriate sustainable results at project level with typology of “lessons learnt” and “best practices” • Evidence of further funding and implementation of activities following up on results achieved with support of UNDP 		

ANNEX 3. PEOPLE CONSULTED

Government of Haiti

ALTIDOR Nicole, Ministre MAST, Ministère des Affaires Sociales et du Travail (MAST)

ALY Jean Roudy, Office de Management des Ressources Humaines

ASTREL Joseph, Directeur Général MDE, Ministère de l'Environnement (MDE)

AUGUSTE Amoce, Directeur Général OPC, Office de Protection du Citoyen

BERNADEL Audain Fils, Ministre du MICT, Ministère de l'Intérieur et des Collectivités Territoriales

BRANLY Eugène, Directeur Général Ministère de l'Agriculture, des Ressources naturelles et du Développement Rural (MARNDR)

CAZEAU Harmel, Directeur de la CNSA, Coordination Nationale de la Sécurité Alimentaire (CNSA)

CELESTIN Jean, Directeur de la Direction des projets sociaux, Fonds d'Assistance Économique et Sociale (FAES)

COFFY Jonas, Ministre du MCI, Ministère du Commerce et d'Industrie

CONSTANT Jean Robert, Secrétaire Technique, CSPJ

COUDO Prénor, Agence Nationale des Aires Protégées (ANAP)

DELICES Max, Directeur Exécutif, Conseil Électoral Provisoire

Elie JEAN PHILIPPE, Office de Management des Ressources Humaines

EUGENE Gerald, Office de Management des Ressources Humaines

FRITZNER Joseph, Ministre du MAST, MAST

GUERRO Plancher Louis, Direction Administrative et Pénitentiaire, Ministère de la justice et de la sécurité pénitentiaire (MJSP)

Guy SERGE, Institut Haïtien des Statistiques et d'Informatique

HERIVEAUX Rudy, Directeur Général MAST, Ministère des Affaires Sociales et du Travail (MAST)

HERTELLOU Jean Pierre, Officier de programme FAES, Coordinateur

James CADET, Directeur Changements climatiques MDE, Ministère de l'Environnement (MDE)

JEANTEL Joseph, Directeur Général ANAP, Agence Nationale des Aires Protégées (ANAP)

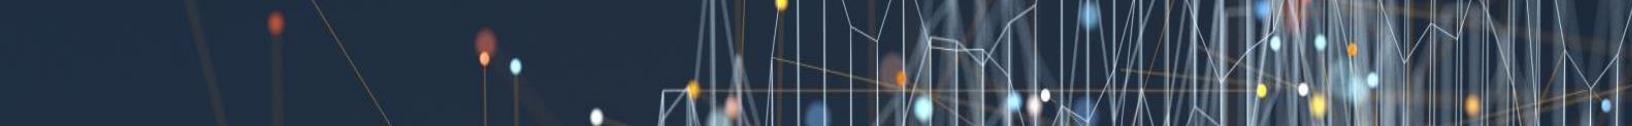

LAJOIE Eudes, Directeur Général, Service Nationale de Gestion des Résidus Solides (SNGRS)

LAMARCHE Philippe, JSSP

LOUIS Raymond Jacques, Directeur Général Ministère de la justice et de la sécurité pénitentiaire (MJSP)

MAGLOIRE René, CNAL, Ministère de la justice et de la sécurité pénitentiaire (MJSP)

MARSEILLE Jean Cyrus, Office de Management des Ressources Humaines

MERJUSTE Give Laure, Office de Management des Ressources Humaines

MOMPREMIER Marie Giselhaine, Ministre du MCFDF Ministère à la condition féminine et aux droits des femmes (MCFDF)

MOMPREVIL Saint Juste, Conseiller CSCCA, Cour supérieure des comptes et du contentieux administratif (CCSCCA)

ORIOL Michèle, Comité Interministériel d'Aménagement du Territoire

PAUL Reginald, Chef de Cabinet du MPCE, Ministère de la Planification et de la Coopération Externe

PIARD Boby Emmanuel, Directeur Général MPCE / CNIGS, MPCE / CNIGS

RICOT Pierre Rodney, Directeur Unité d'étude et de programmation MAST, Ministère des Affaires Sociales et du Travail (MAST)

SANON Wislene, Ministère du Commerce et d'Industrie

SEJOUR Rodriguez, Directeur de Cabinet, Service Nationale de Gestion des Résidus Solides (SNGRS)

SYLVESTRE Rene, Président de la Cour de Cassation et du CSPJ, CSPJ

TANIRA Gay Marie, Service Nationale de Gestion des Résidus Solides (SNGRS)

THOMAS Wisner, Office de Management des Ressources Humaines

Wilson FIEVRE, Directeur Général, Institut Haïtien des Statistiques et d'Informatique

ZAKARI Mahamadou Bassirou Hassan, IGPNH

UNDP

ALCIDE Marie Antolaine, Operations Manager

ALEXANDRE Jean Ronald, Chef Projet

ALEXIS Ardrouin

BANGOURA Sekou, Finance Specialist

BENJAMIN Guerda, Gender Focal Point

BLAIN Marie Kathleen, Chargé de Projet

BONIFAY Claudia, Point focal Etat de Droit / Accès Justice

BOUBAKRI Amor, Point focal Elections

CALIXTE Mulineca, M&E Officer

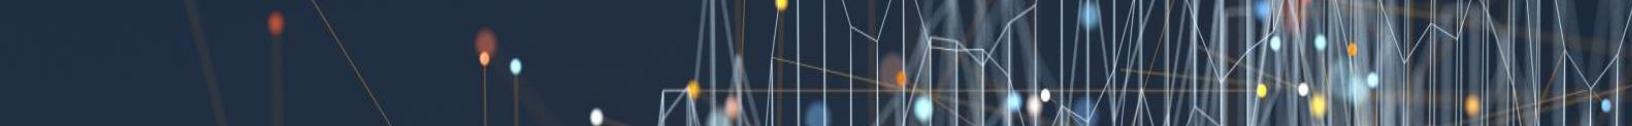

CARRIER Adeline, Programme Specialist

CEUS Stendelet

CUPIDON Marc Joanis, Chargé de Projet

FENEILON Leopold, Programme Analyst

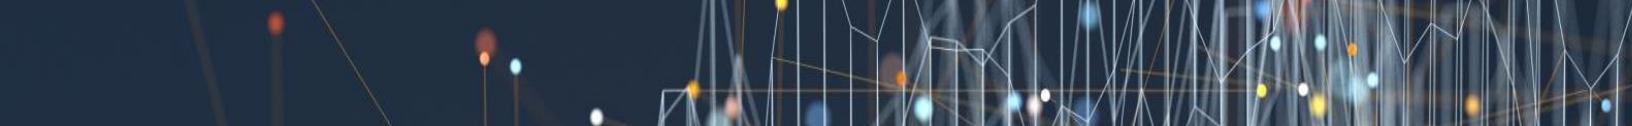

FRANCOIS Marie Pascale, Programme Specialist

GEORGES Yvio, Chef Projet
GERMAIN Guims, Chef Projet
HIDALGO Olivier, Expert gouvernance locale, point focal frontière, jeunesse, UNDP HQ RBLAC
JEAN-MICHEL Durosca, Chef Projet
JEANTY Hervens, Chef Projet
JN PAUL Dorine, Programme Specialist
JOSEPH Jacques-Washington, Chef Projet
JUVIGNY Jacques, Point focal projet DDR/CVR
LACONI Jessica
LAVENTURE Patrice, Expert Technique
LOUIS Obnerson, Chef Projet
MERARD Othniel
NEUVIEME Gerald
PREVINA Kerlande Eliacin
SCIARRA Rita
SOLON Moliere, Communication focal point
TERMILUS Wilner, Chef Projet
VOLTAIRE Renaud

Civil society, Private sector, Academia, Programme beneficiaries

ALONCE Pierre, CCPC Les Irois, Beneficiaire
BARRIENTOS Natalia Corro, Croix Rouge Francaise
BIEN-AIMÉ Paul-Antoine, Professeur, Université d'État d'Haiti
BILLY Gontran, Représentant, FENAMH (Fédération Nationale des Maires d'Haïti)
BOISSON Dominique, Professeur, Université d'État d'Haiti
BRANCHEREAU Amelie, Croix Rouge Francaise
BRAUM Pedro, Viva Rio
BRUNETTI Chiara, Gestion intégrée des marchés, Beneficiaire
CANTAVE Pascale, Représentante, FENAFEMH (Fédération Nationale des Femmes Maires d'Haïti
CERNEUS Bertrand, Coordonnateur CROSE, Beneficiaire
CHANCY Elcia, Jeunes ODD, Beneficiaire
CLAUDE Enrico, Brigadier, Beneficiaire
CLEDANOR Montisino, CTD, Département de la Grande Anse, Coordination CCPC Grande Anse
CLERVEAU Gepson, Jeunes ODD, Beneficiaire
CRAAN Bernard, Président de la Chambre de Commerce et d'Industrie d'Haïti (CCIH), Chambre de Commerce et d'Industrie d'Haiti
DESCARDES Arnoux, Volontariat pour le développement d'Haiti
DESSIPE Venadia, Jeunes ODD, Beneficiaire
DIEUNIE Edouard, Plate-forme communautaire et bénéficiaire projet femmes entrepreneures a Pétion-ville, Beneficiaire
EDMIDE Joseph Guenin, FACSDIS Femme en Action Contre la Stigmatisation el la Discrimination Sexuelle

FEDNEL Joseph, Plateforme Pétion-ville
FOTSO Appolinaire, Chef de mission, ASF (Avocat Sans Frontière)
GUERLINE Thermilus, Membre Plateforme Canapé-vert, Beneficiaire
JEAN-PHILIPPE Rancon , Directeur adjoint, BGRM Geoscience for a sustainable Earth
JEANTY Yolette, Kay Fanm
JOSEPH Gueurson, Coordonnateur de OJADGA, Beneficiaire
LAROSE Vanessa, Bénéficiaire projet Femmes entrepreneures, Beneficiaire
LOVE-Kendy, Coordonnateur, Association des Jeunes de la Ville de Jérémie
MAGLOIRE Daniele, Collectif contre l'impunité
MARIE DOMINIQUE Jeannot, Plate-forme communautaire et bénéficiaire projet femmes entrepreneures a Pétion-ville, Beneficiaire
MARS Louis-Henri, Lakou Lape
MEUS Stephenson, Coordonnateur KOURAJ, LGBTI Community groups
MICHEL Paulemont, Coordonnateur de CODGA, Beneficiaire
MULTY Margareth, Brigadier, Beneficiary
NICOLAS Fidèle, CTD, Département des Nippes, Coordination CCPC Nippes
ODDIN Constant, Bénéficiaires projet Cholera, Beneficiaire
OLGUINE Dena, Plate-forme communautaire et bénéficiaire projet femmes entrepreneures a Pétion-ville, Beneficiaire
PÉTILLON Gael, ASF (Avocat Sans Frontière)
PETIT FRÈRE Rosemila, Représentante, FENAFEMH (Fédération Nationale des Femmes Maires d'Haïti
PHILIPPEAUX Marie Yolaine, Représentante, FENAFEMH (Fédération Nationale des Femmes Maires d'Haïti
PIERRE Jude Édouard, Représentant, FENAMH (Fédération Nationale des Maires d'Haïti)
PIERRE-LOUIS Michele, FOKAL Fondation Connaissance et Liberté
POMPILUS Jean Joseph, CCPC Corail, Beneficiary
PROPHENE Jeudy, Coordonnateur MPPB, Beneficiary
RODRIGUEZ Megan, INL
Rose Midrène Francois, Membre Plateforme Communautaire de Jérémie, Beneficiaire
SAINTE ANNE Germain, Bénéficiaire projet Femmes entrepreneures à Canapé-vert, Beneficiaire
TAPINASSI Silvia, Croix Rouge Francaise
TERRIER Monique, BGRM Geoscience for a sustainable Earth
THILL Magaly, Beneficiary

VEERABADREN Sendy, Croix Rouge Francaise

WESLY Saintilaire, Secrétaire Plateforme communautaire et bénéficiaire projet Femmes entrepreneures,
Beneficiaire

WILCKENSON Alexis, Bénéficiaire composante jeunes, Beneficiaire

WILNA Desir, Bénéficiaires Projet Cholera, Beneficiaire

ZOULA Patricia-Emmanuelle, BGRM Geoscience for a sustainable Earth

ANNEX 4. DOCUMENTS CONSULTED

In addition to the documents named below, the evaluation team reviewed project documents, annual project reports, midterm review reports, final evaluation reports and other project documents. Le evaluation team also consulted many websites, including of the government of Haiti and its partners and international development agencies.

Alinovi, L., D'Errico, M., Mane, E. & Romano, D., 2010, Livelihoods Strategies and Household Resilience to Food Insecurity: An Empirical Analysis to Kenya.

ANNEX 5. STATUS OF COUNTRY PROGRAMME OUTCOME AND OUTPUT INDICATORS

Indicators	Baseline	Target 2021	Status (Progress/Regression)		
			2017	2018	2019
Outcome 1: The public institutions and civil society improve the rule of law and decentralization for good governance at all decision-making levels.					
Indicator 1.1 Taux de détention préventive prolongée et par prison civile (désagrégé par sexe et majeur/mineur).	72%	75%	76% (Target reached)	75% (Target maintained)	75% (Target maintained)
					Sources: Expertise indépendante des droits de l'homme qui fixe à 72% pour l'année 2016 et à 75% en 2018 selon la MINUJUSTH (avec 85% des femmes en prison sont en détention préventive prolongée et 83% des mineurs en conflit avec la loi sont en détention préventive prolongée).
					CO Comment: Le taux est supérieur ou égal à 75% en 2019. HQ Comment: Please set a baseline and a target.
Indicator 1.2 Pourcentage du budget de l'Etat alloué aux collectivités territoriales et aux services déconcentrés	2%	No set target	2% (No progress)	2% (No progress)	2% (No progress)
					CO Comment: Pour l'année 2016-2017, le Fonds de Gestion et de Développement des Collectivités Territoriales (FDGCT) est doté de 2,467,828,479 gourdes. Tenant en compte que le montant total du budget rectificatif pour le même cycle se hisse à 118,580,130,650 gourdes, le FDGCT représente donc un 2,08% du budget national. En ce sens, on constate une progression des fonds alloués aux collectivités territoriales, car le FDGCT représentait 1.41% du budget du cycle précédent, à savoir les années 2015-2016. En effet, le FDGCT a mobilisé 1,734,721,620 gourdes alors que le budget national s'élevait à 122,679,830,801 La ligne de base reste 2% car le budget 2017-2018 a été reconduit pour l'exercice 2018-2019.
					HQ Comment: Please set a baseline and a target.
Indicator 1.3 Taux moyen de participation aux élections présidentielle, législative, municipale et	30%	No set target	27% (Regression)	30% (Some progress back to baseline)	30% (No progress)
					Sources: CEP, Election October 2015

locale (désagrégé par types d'élections, sexe, âge et zones géographiques si possible					CO Comment: En raison du report des élections planifiées pour 2019 et possiblement planifiées pour la fin 2020, la ligne de base reste inchangée. (27.44% pour les élections ASEC, CASEC et délégués de ville de janvier 2017) HQ Comment: Please set a baseline and a target.
Outcome 2: The population, particularly the most vulnerable, have equitable access to livelihoods, decent green jobs and productive resources to reduce poverty in all of its forms, within a favourable and inclusive socio-economic and cultural environment.					
Indicator 2.1 Taux d'emploi (structuré et non structuré), ventilé par secteur et sous-secteur, sexe, âge et groupes exclus et par catégorie salariale lorsque ces données sont disponibles	3.8%	3.8%	3.8% (No progress)	3.8% (No progress)	24% (Significant progress) Sources: Enquête mortalité, morbidité et utilisation des services 2016-2017 (EMMUS-VI) Emploi : Plus de 26 % des hommes et 44 % des femmes Tendance : Le pourcentage de femmes ayant travaillé au cours des douze derniers mois a légèrement augmenté par rapport à l'EMMUS de 2012, passant de 52 % à 56 %. Pour les hommes, le pourcentage est resté inchangé (74 %).
					CO Comment: Dans le cadre de l'EMMUS-VI (2016-2017), on s'est intéressé au type d'occupation des enquêtés qui travaillaient. Parmi les femmes de 15-49 ans ayant travaillé durant les douze mois précédent l'enquête, 71 % étaient occupées dans le secteur des ventes et services ; dans 9 % des cas, les femmes occupaient un emploi qualifié, 8 % étaient employées de maison et le même pourcentage travaillait dans l'agriculture. En ce qui concerne les hommes, on constate que 37 % travaillaient dans l'agriculture, 24 % avaient un emploi manuel qualifié, 18 % un emploi technique qualifié, et 16 % travaillaient dans les ventes et services. Comparé à l'EMMUS de 2012, on n'observe pas de changements importants dans les secteurs d'activité économique occupés par les femmes. Par contre chez les hommes, le pourcentage occupant un emploi manuel qualifié est passé de 4 % durant l'EMMUS de 2012 à 24 % en 2017, tandis que le pourcentage occupé dans le secteur agricole continue de diminuer, passant de 44 % en 2012 à 37 % selon l'EMMUS actuelle. HQ Comments: Please set a baseline and a target.
Indicator 2.2 Pourcentage de la population ayant accès aux prestations sociales contributives et non contributives	10%	No set target	10% (No progress)	10% (No progress)	10% (No progress) Sources: https://fr.slideshare.net/FAESHAITI/presentation-edp-pepnEn attente de production de données par le PAM

contributives par sexe.					CO Comments: Données non disponible en 2019 on garde le baseline. Données non disponible en 2018 on garde le baseline. Estimation 10% selon la présentation de la stratégie Ede Pep du FAES (2013): https://fr.slideshare.net/FAESHAITI/presentation-edepnEn attente de production de données par le PAM HQ Comments: Please set a baseline and a target.
Indicator 2.3 Prévalence de l'insécurité alimentaire	41%	No set target	41% (No progress)	41% (No progress)	50.2% (Some progress)
					Source: Ministère de la santé publique et de la population, 2018. Haïti, Enquête mortalité, morbidité et utilisation des services (EMMUS VI), 2016-2017.
					CO Comments: 2,26 millions de personnes sont classées comme étant en situation d'insécurité alimentaire et ont besoin d'une aide humanitaire à cet égard. Selon l'analyse du cadre intégré de classification de la sécurité alimentaire (IPC) conduite en octobre 2019 au niveau national, 3,7 millions de personnes vivent en insécurité alimentaire aigüe dont 2,8 millions sont en milieu rural (38 % de la population rurale). HQ Comments: Please set a baseline and a target. What is the unit of this indicator? A percentage?
Outcome 3: National, regional and local institutions and civil society improve the management of rural and urban areas, agriculture and the environment, and mechanisms for preventing and reducing risks in order to improve the resilience of the population to natural disasters and to climate change.					
Indicator 3.1 Position d'Haïti dans l'indice pour la gestion des risques	6	6.5	6.5 (Target reached)	6.5 (Target maintained)	6.5 (Target maintained)
					Source: INFORM
Indicator 3.2 Cout en % du PIB des pertes économiques dues aux catastrophes.	2%	2%	2%	2%	2%
					CO Comments: 2% (Les données de la Banque Mondiale pour l'année 2017 ne sont pas encore disponibles). HQ Comments: The target is less than 2%.
Indicator 3.3 Pourcentage d'aires protégées déclarées	No set baseline	45%	0%	n/a	0%

disposant d'un plan de gestion mis en œuvre par des entités nationales formées					<p>CO comments: Seulement 4 des 25 aires protégées existantes disposent d'un Plan de gestion. Le Ministère de l'Environnement, à travers divers initiatives, travaille avec les partenaires techniques et financiers de manière à doter les autres aires protégées d'une structure et d'un plan de gestion.</p> <p>Le PNUD, à travers le projet ABE, a contribué à l'élaboration et la validation du plan de gestion du Parc national des trois Baies (PN3B) en collaboration avec la TNC (The Nature Conservancy) établi sur 75 406 ha, dans le cadre du Programme sur la biodiversité marine des Caraïbes (CMBP). Ce plan de gestion propose un modèle de cogestion entre ANAP, FoProBiM et le Comité Local d'Appui (CLA) du PN3B et les autorités locales afin de renforcer la gestion du PN3B et la conservation de ses ressources naturelles.</p> <p>Le projet EBA a aussi apporté sa contribution dans le processus d'élaboration et de validation du Plan de gestion de l'Unité I de la Forêt des Pins</p> <p>L'action du PNUD a permis d'aboutir à la déclaration officielle de l'aire marine et terrestre protégée de Barradères Cayemites (départements Nippes et Grand' Anse, 87621 ha) ainsi que le Parc National Lagons des Huîtres (département du Sud-Est, 9640 ha). Par ailleurs, un arrêté communal pour la préservation environnementale (zone non constructible) a été adopté au Cap Haïtien ainsi que deux arrêtés communaux, l'un sur la protection des aires marines protégées et l'autre fixant la réglementation des sennes de plage, élaborés dans le cadre de l'activité sur la pêche du projet EBA.</p> <p>2020: Inventaire des ressources naturelles /ligne de base complexe Marigot - Massif La Selle- Anse-à-Pitre et un plan d'aménagement territoriale pour ce même complexe.</p>
					HQ Comment: Please set a baseline and a target.
Indicator 3.4 Nombre de km de plantation linéaires le long du littoral et des ravines réduisant les risques aux désastres.	No set baseline	No set target	0	n/a	88
					<p>CO Comments: Beaucoup de travaux ont été entrepris par les Ministères de l'Environnement et de l'Agriculture en collaboration avec des ONG et d'autres institutions nationales et internationales dans le but de réduire les risques aux désastres en Haïti.</p> <p>Après le passage des Ouragans Mathew et Irma, le projet ABE a mis en œuvre des activités de protection de ravines au niveau des zones d'interventions. Ainsi, en collaboration avec les organisations communautaires de base, des seuils se sont érigés au niveau de certaines ravines sur environ 88 000 m linéaire</p>
					HQ Comment: Please set a baseline and a target.

Output Description	Output Indicator # /description		Output Indicator Baseline	Output Indicator Target by 2021	Output Indicator Value 2017	Output indicator value 2018	Output indicator value 2019
Output 1.1: The capacities of State legal institutions are reinforced allowing women and men to enjoy greater access to formal justice and a safer environment. 	Indicator 1.2.2 Number of departments in which the coordination of deconcentrated services by the delegations were undertaken through a planning and monitoring mechanism.	1	5	1 (No progress)	1 (No progress)	1 (No progress) CO Comments: Données non disponible pour 2017, 2018 et 2019, on rapporte la valeur de la ligne de base.
	Indicator 1.2.3 Percentage of increase in total amount of local taxes collected from all communes of the country	0%	25%	0% (No progress)	0% (No progress)	0% (No progress) CO Comments: La pression fiscale en Haïti est très faible vu le contexte socioéconomique et politique. En absence de données actualisées pour 2019, on rapporte la valeur de la ligne de base.
Output 1.3: Subnational development plans are gender-sensitive and in line with the sustainable development goals (SDGs).	Indicator 1.3.1 Percentage of communes with a communal development plan including gender goals and sex-disaggregated objectives	0%	25%	0% (No progress)	0% (no progress)	0% (No progress) Source: Ministère de la planification et de la coopération externe MPCE, Ministère de l'Intérieur et des Collectivités Territoriales (MICT) CO Comments: Parmi les 12 communes frontalières appuyées par le projet AGLDT en 2019, 2 d'entre elles sont en train d'élaborer leur PCD. L'aspect genre et les ODD sont pris en compte.
Output 1.3: Subnational development plans are gender-sensitive and in line with the sustainable development goals (SDGs).	Indicator 1.3.2 Number of existing departmental development strategies, and percentage of them aligned with the SDGs	1. Number of existing departmental development strategies	2	5	2 (No progress)	4 (Some progress) Source: Ministère de la planification et de la coopération externe MPCE, MICT CO Comments: Il existe un document d'évaluation des capacités des 10 Directions Départementales du MPCE de la bande frontalière élaboré par le projet en 2019.
		2. Percentage of existing departmental development strategies, aligned with the SDGs	0%	60%	0% (No progress)	0% (No progress) Source: Ministère de la planification et de la coopération externe MPCE Ministère de l'Intérieur et des Collectivités Territoriales (MICT) CO Comments: Ce document d'évaluation des capacités des 10 Directions Départementales du MPCE de la bande frontalière n'a pas abordé l'aspect ODD.
Output 1.4: Mechanisms instruments and spaces of	Indicator 1.4.1 No. of social accountability mechanisms linked to public services provision created at departmental and communal level	0	5	0 (No progress)	0 (No progress)	0 (No progress)

communication dialogue and interaction between the State and citizens to increase citizen control are in place and operational.	Indicator 1.4.2 Percentage of women	1. Percentage of women in elected positions (Chambre des députés)	0%	30%	25% (Some progress)	25% (No progress)	25% (No progress) Source: Données CEP
		2. Percentage of women (Au niveau municipal)	35%	40%	35% (No progress)	35% (No progress)	35% (No progress) Source: Données CEP
Output 2.1: The available options for inclusive and sustainable social protection are operational and supported.	Indicator 2.1.1 No. of social protection institutions that have reviewed targeting of their beneficiaries in order to better respond to the needs of the most vulnerable	0	2	0 (No progress)	0 (no progress)	1 (Some progress) Source: UOPES CO Comments: Les travaux interministériels qui devraient être inités en 2019 dans le cadre des ODD permettront de suivre de façon plus précise cet indicateur.	
	Indicator 2.1.2 Number of public institutions that have received the UOPES SDG seal	0	4	0 (No progress)	0 (no progress)	0 (no progress) CO Comments: Le PNUD ne dispose pas de données actualisées pour cet indicateur. Les travaux interministériels qui devraient être inités en 2019 dans le cadre des ODD permettront de suivre de façon plus précise cet indicateur.	
	Indicator 2.1.3. No. of sectoral ministries whose budget and investment plans are gender-sensitive	0	3	0 (no progress)	0 (No progress)	1 (some progress) Source: Ministere a la Condition Feminine et aux Droits de la Femme CO Comments: Le Budget national 2017-2018 a été reconduit pour une deuxième année consécutive (2020-2021). Cependant les investissements et l'exécution du budget ont suivi les prescriptions de la politique d'égalité de sexes du Ministère à la condition féminine et au droit de la femme. Le PNUD planifie d'appuyer Ministère à la condition féminine et au droit de la femme, MCFDF dans l'évaluation et l'actualisation de sa politique d'égalité femmes hommes 2014-2034 et son plan d'action.	
	Indicator 2.1.4. National statistical policy in place and implemented	No	Yes	No (No progress)	No (No progress)	No (No progress) CO Comments: Les travaux interministériels qui devraient être inités en 2019 dans le cadre des ODD permettront de suivre de façon plus précise cet indicateur.	

Output 2.2: Women and youth benefit from facilitated access to economic opportunities including in the formal job market.	Indicator 2.2.1 No. of unemployed persons trained to seek employment in formal economy, by age and sex	900	3400	900 (No progress)	900 (No progress)	900 (No progress) Source: Ministere du Travail CO Comments: Pas de donnees disponible pour les resultats de 2017 a 2019, le baseline a ete considere.
	Indicator 2.2.2 No. of new micro-, small and medium-sized enterprises in supported value chains, disaggregated	50	250	82 (Some progress)	125 (Some progress)	150 (Some progress) Source: Ministère du Commerce et de l'Industrie (MCI) http://haiti24.net/papej-jovenel-moise-remet-des-cheques-a-une-nouvelle-cohorde-de-jeunes-entrepreneurs/ CO Comments: Les donnees pour le PNUD ont été rapportées dans le IRFF pour l'annnee 2019. Mais nous ne disposons pas de donnees completes et valides pour le pays. Les donnees reportees sont une estimation.
	Indicator 2.2.3. No. of new sustainable jobs and livelihoods created, disaggregated	350000	350000	350000 (Target maintained)	350000 (Target maintained)	350000 (Target maintained) Source: IHSI http://www.ihsi.ht/produit_economie_ie_pres.html CO Comments: Le PNUD ne dispose pas de données actualisées pour cet indicateur. Cependant selon IHSI l'indice d'emploi a encore baisse pour l'annee 2019. Indice d'Emploi a affiché à nouveau une tendance baissière au 1er trimestre de l'année fiscale 2019, soit une chute de 1.2 %.
Output 2.3: National and territorial agricultural institutions are operational in order to carry out in-depth transformation of agricultural production methods which would be both sustainable and employment- and income- -	Indicator 2.3.1 No. of new rural development programmes aligned with the sustainable development goals implemented by the Ministry of Agriculture	1	3	1 (No progress)	1 (No progress)	2 (Some progress) Source: Ministere de L'Agriculture, des Ressources Naturelles et du Developpement (MARNDR) CO Comments: Les donnees pour le PNUD ont été rapportées dans le IRFF mais nous ne disposons pas de donnees pour le pays.
	Indicator 2.3.2. No. of rural households with access to small-scale irrigation on their plots	21000	49000	21000 (No progress)	21000 (No progress)	21000 (No progress) Source: Ministere de L'Agriculture, des Ressources Naturelles et du Developpement (MARNDR) CO Comments: Les donnees pour le PNUD ont été rapportées dans le IRFF mais nous ne disposons pas de donnees pour le pays.

generating.						
Output 3.1: National actors have the knowledge capacities and necessary tools to improve natural resources management and risk reduction and management.	Indicator 3.1.1 No. of multi-risk maps and risk reduction plans that take into consideration the differentiated impact of risks for women and men	0	not defined	n/a	n/a	<p>37 CO Comments: Projet Cartographie multirisques et gestion de l'occupation du sol - Nord'Ouest 2019 : Réalisation de 13 cartes communales, 9 cartes thématiques (points d'eau, végétation etc..) et 1 carte départementale pour l'aléa Sécheresse et de 13 cartes communales et 1 carte départementale pour l'aléa Submersion marine et Tsunami</p> <p>2020: Réalisation de 13 cartes communales et 1 carte départementale pour chacun des aléas suivants: Mouvement de terrain, dégradation des sols et inondation</p> <p>Projet Renforcement de la prévention des risques naturels et de la gouvernance territoriale - Sud 2019: Réalisation par le projet Renforcement de la prévention des risques naturels et de la gouvernance territoriale, de 4 cartes multirisques départementaux sur 4 aléas : Sismique, Mouvement de terrain, Sécheresse et dégradation de sol, Inondation et subversion marine</p> <p>2020: Finalisation des 4 cartes multirisques départementaux pour le Nord'Ouest</p>
	Indicator 3.1.2 No. of legislative or regulatory measures taken to improve risk management linked to environmental vulnerability	not defined	4	n/a	n/a	<p>2 CO comments: Soumission au parlement d'un projet de loi portant la création du Système National de Gestion des Risques et Désastres (SNGRD) et d'un projet de loi créant la Direction Générale de la Protection Civile (DGPC)</p>

	Indicator 3.1.3. No. of community or commercial initiatives and/or new regulatory measures implemented at the local level to reduce vulnerability of water resources to climate change hazards	not defined	not defined	n/a	n/a	2 CO Comments: Le projet EBA travaille sur la réhabilitation de deux Lacs collinaires dans la région de Belle-Anse en vue d'augmenter leurs étanchéités par la mise en place d'une géomembrane et la protection des berges par la revégétalisation.
	Indicator 3.1.4. Existence of a national database on losses and damages due to disaster, disaggregated by sex and age	not defined	Yes	n/a	n/a	Yes (Target maintained) CO comments: 2019 : Création de l'architecture d'une base de données nationale sur les pertes et dommages dus aux catastrophes et aux changements climatiques 2020: Implementation de la base de données.
Output 3.2: Mechanisms and partnerships are set up to promote sustainable modes of production distribution and consumption.	Indicator 3.2.1: No. of new mechanisms and partnerships at national and local levels that are financed, disaggregated by type of partnership	not defined	2	n/a	n/a	1 Source: Document d'Accord signé CO Comments: Le projet de Renforcement de la prévention des risques naturels et de la gouvernance territoriale a signé un Accord de partenariat avec l'Université d'Etat d'Haiti (UEH) dans le cadre d'un appui au Master Géosciences (URGéo) de la Faculté des Sciences (FDS).
Output 3.3: The capacities of public administrations to enforce the application of environmental norms and good practices are strengthened.	Indicator 3.3.1 No. of regulations adopted for the preservation, sustainable management and sharing of benefits of the natural resources, biodiversity and ecosystems	0	5	n/a	n/a	3 (Some progress) CO Comments: Le projet ABE accompagne le Ministère de l'Environnement dans la mise en place de plusieurs outils dans le cadre du renforcement de capacités du Bureau National de l'Evaluation Environnementale (BNNE). 2019 : Guides méthodologiques sur l'Evaluation Environnementale Stratégiques (EES) pour trois secteurs (Agriculture, Transport, Energie)
	Indicator 3.3.2 No. of effectively processed files within the Ministry of the Environment for environmental non-objections	not defined	40	n/a	n/a	20 Source: Bureau de l'Evaluation Environnementale (BNNE) CO Comments: Au cours de l'année 2019, le Bureau National de l'Evaluation Environnementale (BNNE) a traité 20 dossiers, relatifs aux demandes de non-objection environnementale, desquels 18 non-objections ont été accordées.
