

## ERC FINAL EVALUATION

**First name:**

.....

**Organization:**

.....

.....

.....

**Last Name:**

.....

**Position:**

.....

.....

**Email:**

.....

*This questionnaire will allow us to collect a preliminary contribution from the different stakeholders on their perspective on the ERC project. Your field-based experience is invaluable and completion of the questionnaire as frankly as possible will be greatly appreciated!*

### Two important definitions

**Output:** Outputs are short-term development results produced by project activities. Usually they are concrete, tangible products. Think of children tasting the fish soup!

**Outcome:** Outcomes are medium-term development results created through the delivery of outputs and the contributions of various partners and non-partners. They normally relate to changes in institutional performance or behaviour among individuals or groups. Think of children liking and eating the fish soup for the rest of their lives!

### Questionnaire

1. How would you describe your organization:

Type of organization	✓
International organization	
Caribbean regional organization	
National Meteorological Services	
National Disaster Management Agency	
Other (please describe): ..... .....	

## 2. What were the main challenges to the introduction of DEWETRA

Challenge	✓
Data were not available at country level	
Owners of data did not want to share them	
Other tools were available at national level	
DEWETRA is too complicated	
Other (please describe): ..... .....	

## 3. Was it possible to overcome the challenges? How?

.....

.....

.....

.....

## 4. Can you provide an example of how DEWETRA has changed your work?

.....

.....

.....

## 5. Bearing in mind the aforementioned definitions of outputs/outcomes, can you list **one or two outcomes** of the project not necessarily related to DEWETRA that are particularly relevant from your point of view?
