- Evaluation Recommendation or Issue 4: Clearer, written, assignment of roles, responsibilities and authorities at the project start would help to avoid such situations and the resulting delays. It should be noted that the decision to have project managers recruited by the Government was applicable to all projects, not specifically the UNDP-implemented, GEF-financed project				
Management Response: The management arrangements were clear in the project document. However, the attitude of the Ministry of Finance changed at a specific point in time owing to their desire to see more ownership of the projects by the Parent ministries. The requirement for project managers to be within government was applicable to all UNDP-implemented GEF projects, not other agencies' projects.
