

Reference project PAL 1 o 86815

Date: 12 February 2018

Project: Hydroclimate Model, EXACT

Note to the File

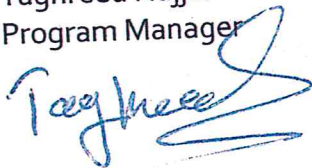

Subject: Project final evaluation report -Management Response-Point 3.1

Reference is made to the project evaluation recommendation # 3 "Supporting the visualization tool revealed to be a good exercise to share data and knowledge between the parties", and UNDP's related management response # 3.1 "UNDP to follow up with the project counterparts and communicate with EU on the need to support hosting and maintaining the visualization tool beyond 2018".

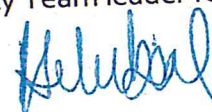

Following up on the commitment made by the project counterparts (Palestinian Water Authority, Israeli Water Authority, Jordanian Ministry of Water and Irrigation) in October 2017 at the training workshop in France, UNDP project management team approached the project's focal points in the three countries in December 2017 and January 2018 to further discuss the need to maintain hosting the visualization tool beyond the ending date of the project.

However, despite several reminders the Palestinian and Jordanian counterparts refrained from pursuing their interest to maintain such platform, mainly due to the deterioration of political situation and their interest on the need to discuss any possible regional cooperation under the umbrella of EXecutive ACtion Team (EXACT) initiative to avoid any political consequences. On other front, the focal point from the Israeli Water Authority explicitly expressed his concerns that the visualization tool is not relevant any more to the Israeli counterparts. Accordingly, the above-mentioned management response is not foreseen as a possible option to be implemented under the framework of the UNDP EU funded project.

Dear Taghreed

hope you are fine and doing well,

After discussion with my colleagues, please be informed that PWA is highly appreciate UNDP efforts in this project, and PWA would like to continue this effort and building on its results, however, PWA believes that the future cooperation should be discussed under the umbrella of EXACT project.

Regarding the visualization tool PWA believes that it is useful, but we also have the raw data which should serve the purpose

many thanks and looking forward to working with you in near future.
